Open the world of possibilities

A pioneer and leader in education technology since 1997, Promethean is committed to transforming the way the world learns and collaborates. Our award-winning solutions are used in more than 126 countries and have earned us our position as the #1 global leader in interactive displays for K12 education.*

Promethean continues to explore, innovate, and inspire—designing tools that keep learning, collaboration, and connection on the cutting edge.

Changing our world for the better

Our mission:
Transform the way the world learns and collaborates.

Our vision:
Be the preferred global partner for teaching, learning, and collaboration.

Spanning the globe, our dedicated team is united by a shared purpose and passion to create tools that capture attention, spark ideas, and ignite learning. We're driven to design solutions that reward imagination and persistence. And, we strive to be the best partner to our customers with every interaction, now and for the long term.

ActivPanel for Higher Education

Our holistic, interactive solution for higher education—including hardware, software, and professional development—enables students, faculty, and staff to collaborate and engage in enriching, connected experiences from anywhere and from any device.
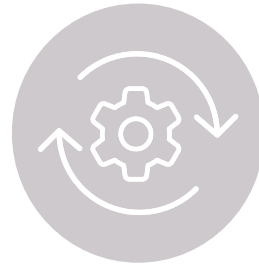

The keystone of our solution is the award-winning ActivPanel. Robust, seamless, and secure, the ActivPanel meets the unique needs of diverse users, spaces, and campuses.

Simplicity

Designed for ease of use from the first sign-on, the ActivPanel empowers users to deliver enriching content in hybrid, HyFlex, and traditional education and workplace settings.

Adaptability

The ActivPanel seamlessly integrates with existing IT infrastructure and custom environments, helping institutions adapt to ever-changing circumstances and digital advancements.

Longevity

Our high-performance, durable, and innovative technology is designed with robust capabilities that will last well into the future, so you can be confident in your long-term investment.

Connectivity

The ActivPanel ensures engagement and equitable access for all. Link any device to the panel to share materials and collaborate with in-person and remote participants.

Security

Enhanced features, including multiple sign-in options and remote panel management, support expanded security. Protect sensitive data, ensuring compliance with privacy guidelines.

A holistic, interactive technology solution

ActivPanel 9

Built for breakthroughs, the ActivPanel offers superior quality, longevity, and value.
Our best-in-class panels—in 65", 75", and 86" display sizes—provide an exceptional touch
experience, high-caliber audio and visuals, bonded glass for improved viewing and brightness,
and one-touch access to the web and cloud.

Game-changing accessories and professional support

We offer a suite of peripherals to enhance the user experience. And, we are committed to being your partner for the long-term.

ActivPen, a highly functional stylus that acts as a slide advancer, magnifying tool, and laser pointer

Capture card for seamless content sharing

Logitech wireless keyboard with trackpad

Distance learning bundle with camera and tripod

Panel management

Choose between two solutions, Promethean Panel Management and Radix VISO Premium. Both provide a robust approach to securely managing and maintaining a fleet of devices. Monitor and configure panels from anywhere via a cloud-based management profile whenever updates are needed.

Professional development

We're committed to our customers long after the sale. To help you get the most from your investment, we provide continuing training and support for users and IT administrators. Get customized training from our experienced Education Consultants, as well as on-demand resources and tutorials on Learn Promethean

A digital transformation for your campus

Boost collaboration, creativity, and engagement in and out of the classroom, across campuses, and throughout every aspect of your institution.

Learning environments

From the lecture hall to the lab, ActivPanel creates space where complex subjects and fresh ideas can be explored. Seamlessly integrating with existing tech, the display makes it easy for faculty to access and share custom content and engage students.

Small group rooms
Using panel apps like Screen Share and Whiteboard, students create projects and master class topics together. In virtual one-on-one sessions, advisors and students can share and discuss coursework. And instructors can easily connect with peers across campuses.

Libraries and information centers
Create a centralized informational hub in community spaces. Publicize resources, display campus information, calendars, and maps, and promote extracurricular programs and activities. Plus, lock the screen so only select content is shared.

Alternative spaces

Up-level programs beyond academics. With ActivPanel, athletic teams develop strategic plays, review games, and build training plans. Drama groups and extracurricular clubs plan activities and organize programs. And, in student unions and dormitory common areas, the panel brings students together for events and games.

Business administrative services

Maintain business continuity for administrative staff working onsite or remotely. Launch meetings with one touch using Quicklaunch and familiar apps like Zoom and Microsoft Teams. Build and deliver powerful presentations with panel tools.

We're proud to be the #1 global leader in interactive flat panel displays for K-12 education.*

Our edtech solutions are used more than 126 countries. We're honored to be recognized for our innovations with more than 40 award wins and nominations in the last five years.
